The Ultimate Time Machine: A Remote Viewer's Perception of Time, and Predictions for the New Millennium Joseph McMoneagle, Charles T. Tart

Joseph McMoneagle is an extraordinary remote viewer, a "psychic spy," whose experiences have given him a special insight into the nature of time and human perception. For more than seventeen years, he was a researcher and remote viewer for the top-secret Army project *STARGATE*. For years after that, he journeyed through time while working in a consciousness-development lab with out-of-body experience pioneer Robert A. Monroe.

McMoneagle explores the questions that philosophers have for centuries debated: Does time really exist? Do our actions today really affect our future? Can we change the past? Do we slip between alternate realities? In *The Ultimate Time Machine*, McMoneagle delivers new insights into these mysteries, including:

- First-hand information--including transcripts from lab sessions--on the origins of humanity, the crucifixion of Jesus Christ, and the building of the Egyptian pyramids.
- Provocative suggestions about the nature of time, creation, and a constantly changing past.
- A detailed picture of our immediate future through the year 2075.
- More than 150 very explicit predictions on world population, aging, religious fragmentation, lifestyle changes, technological developments, and dozens of major changes to laws, customs and practices--all within a positive and constructive framework.
- A vision of the year 3000, comprising a test of what the author calls the "Verne Effect"--our ability to create and manipulate our future.
