RNA Nanotechnology

RNA Nanotechnology

In the past few decades there has been incredible growth in "bionano"-related research, which has been accompanied by numerous publications in this field. Although various compilations address topics related to deoxyribonucleic acid (DNA) and protein, there are few books that focus on determining the structure of ribonucleic acid (RNA) and using RNA as building blocks to construct nanoarchitectures for biomedical and healthcare applications.

RNA Nanotechnology is a comprehensive volume that details both the traditional approaches and the latest developments in the field of RNA-related technology. This book targets a wide audience: a broad introduction provides a solid academic background for students, researchers, and scientists who are unfamiliar with the subject, while the in-depth descriptions and discussions are useful for advanced professionals.

The book opens with reviews on the basic aspects of RNA biology, computational approaches for predicting RNA structures, and traditional and emerging experimental approaches for probing RNA structures. This section is followed by explorations of the latest research and discoveries in RNA nanotechnology, including the design and construction of RNA-based nanostructures. The final segment of the book includes descriptions and discussions of the potential biological and therapeutic applications of small RNA molecules, such as small/short interfering RNAs (siRNAs), microRNAs (miRNAs), RNA aptamers, and ribozymes.

From reader reviews:

Michael Madden:

Information is provisions for people to get better life, information these days can get by anyone with everywhere. The information can be a understanding or any news even a concern. What people must be consider while those information which is inside former life are challenging be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you find the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take RNA Nanotechnology as the daily resource information.

Adria Jenkins:

Would you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you never know the inside because don't ascertain book by its handle may doesn't work the following is difficult job because you are frightened that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer might be RNA Nanotechnology why because the fantastic cover that make you consider in regards to the content will not disappoint an individual. The inside or content will be fantastic as the outside or cover. Your reading 6th sense will directly guide you to pick up this book.

James Rodriguez:

Reading a book to become new life style in this yr; every people loves to read a book. When you read a book you can get a wide range of benefit. When you read publications, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself read a fiction books, such us novel, comics, as well as soon. The RNA Nanotechnology provide you with a new experience in examining a book.

Fatima Leonard:

Reading a e-book make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is created or printed or highlighted from each source which filled update of news. With this modern era like right now, many ways to get information are available for anyone. From media social like newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just seeking the RNA Nanotechnology when you desired it?
