Hunting and the Politics of Violence before the English Civil War (Cambridge Studies in Early Modern British History)

Daniel C. Beaver

Hunting and the Politics of Violence before the English Civil War (Cambridge Studies in Early Modern British History) Daniel C. Beaver

A major contribution to debates about the origins of the Civil War, this study of English forests and hunting from the late sixteenth century to the early 1640s explores their significance in the symbolism and effective power of royalty and the nobility in early modern England. Blending social, cultural and political history, Dan Beaver examines the interrelationships among four local communities to explain the violent political conflicts in the forests in the years leading up to the civil war. Adopting a micro-historical approach, the book explores how local politics became bound up with national political and ideological divisions. The author argues that, from the early seventeenth century, a politics of land use in forests and other hunting reserves involved its participants in a sophisticated political discourse, touching on the principles of law and justice, the authority of the crown and the nature of a commonwealth.
