Computer Vision for Biomedical Image Applications: First International Workshop, CVBIA 2005, Beijing, China, October 21, 2005, Proceedings (Lecture Notes in Computer Science)

With the rapid increase in the variety and quantity of biomedical images in recent years, we see a steadily growing number of computer vision technologies applied to biomedical applications. The time is ripe for us to take a closer look at the accomplishments and experiences gained in this research subdomain, and to strategically plan the directions of our future research. The scientific goal of our workshop, “Computer Vision for Biomedical Image Applications: Current Techniques and Future Trends” (CVBIA), is to examine the diverse applications of computer vision to biomedical image applications, considering both current methods and promising new trends. An additional goal is to provide the opportunity for direct interactions between (1) prominent senior researchers and young scientists, including students, postdoctoral associates and junior faculty; (2) local researchers and international leaders in biomedical image analysis; and (3) computer scientists and medical practitioners. Our CVBIA workshop had two novel characteristics: each contributed paper was authored primarily by a young scientist, and the workshop attracted an unusually large number of well-respected invited speakers (and their papers). We had the good fortune of having Dr. Ayache of INRIA, France to talk about “Computational Anatomy and Computational Physiology,” Prof. Grimson of MIT to discuss “Analyzing Anatomical Structures: Leveraging Multiple Sources of Knowledge,” Dr. Jiang of the Chinese Academy of Sciences to present their work on “Computational Neuroanatomy and Brain Connectivity,” Prof.

From reader reviews:

Joshua West:

The book Computer Vision for Biomedical Image Applications: First International Workshop, CVBIA 2005, Beijing, China, October 21, 2005, Proceedings (Lecture Notes in Computer Science) can give more knowledge and information about everything you want. Why then must we leave a good thing like a book Computer Vision for Biomedical Image Applications: First International Workshop, CVBIA 2005, Beijing, China, October 21, 2005, Proceedings (Lecture Notes in Computer Science)? Several of you have a different opinion about reserve. But one aim in which book can give many info for us. It is absolutely correct. Right now, try to closer with your book. Knowledge or details that you take for that, you could give for each other; you may share all of these. Book Computer Vision for Biomedical Image Applications: First International Workshop, CVBIA 2005, Beijing, China, October 21, 2005, Proceedings (Lecture Notes in Computer Science) has simple shape but you know: it has great and big function for you. You can appear the enormous world by open up and read a e-book. So it is very wonderful.

Michael Walker:

As people who live in often the modest era should be upgrade about what going on or facts even knowledge to make these individuals keep up with the era and that is always change and advance. Some of you maybe will update themselves by looking at books. It is a good choice for yourself but the problems coming to anyone is you don't know what kind you should start with. This Computer Vision for Biomedical Image Applications: First International Workshop, CVBIA 2005, Beijing, China, October 21, 2005, Proceedings (Lecture Notes in Computer Science) is our recommendation so you keep up with the world. Why, because this book serves what you want and need in this era.

Jeffrey Ramsey:

Reading a book can be one of a lot of exercise that everyone in the world loves. Do you like reading book so. There are a lot of reasons why people love it. First reading a guide will give you a lot of new facts. When you read a reserve you will get new information due to the fact book is one of a number of ways to share the information or maybe their idea. Second, studying a book will make you more imaginative. When you looking at a book especially hype book the author will bring someone to imagine the story how the people do it anything. Third, you could share your knowledge to other individuals. When you read this Computer Vision for Biomedical Image Applications: First International Workshop, CVBIA 2005, Beijing, China, October 21, 2005, Proceedings (Lecture Notes in Computer Science), it is possible to tells your family, friends in addition to soon about yours publication. Your knowledge can inspire different ones, make them reading a book.

Orville Hightower:

What is your hobby? Have you heard this question when you got learners? We believe that that issue was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person similar to reading or as reading through become their hobby. You should know that reading is very important and book as to be the thing. Book is important thing to add you knowledge, except your teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you go onto be your object. One of them are these claims Computer Vision for Biomedical Image Applications: First International Workshop, CVBIA 2005, Beijing, China, October 21, 2005, Proceedings (Lecture Notes in Computer Science).
