Barron's AP Computer Science A Roselyn Teukolsky M.S.

This best-selling review manual has been thoroughly updated to reflect the College Board's elimination of the Level Ab course and the updated Level A syllabus. The new edition presents three full-length Ap practice exams for the Level A course. The first exam is a diagnostic test and contains charts detailing the topics for each question. All three model tests have questions answered and explained. Test takers will also find an extensive subject review including new sections on static variables, the List interface, Integer.Max_Value, and Integer.Min_Value. A section on two-dimensional arrays is included for the Level A exam.
